

INSTALLING YOUR SHOWER HEATER

Before you begin installing your new shower heater please note: The following instructions were written with the assumption that the installer has a basic knowledge of home plumbing and electrical functions. It is vitally important that **if you do not understand** these procedures you must **seek the services of a professional** to install this unit.

Step 1

WRAP with teflón tape:

- a. Tightly wrap both ends of a ½” straight nipple (not included)
- b. The threads on the heater output, where the head attaches.

Step 2

Screw one end of the nipple into the back of the heater.

Step 3

Screw the heater firmly onto the pipe. Gently tighten the heater with an adjustable wrench. (Take care not to over tighten)

Step 4

EXTREMELY IMPORTANT!!
DO NOT CONNECT POWER BEFORE ALLOWING WATER TO FLOW THROUGH THE SHOWER HEATER FOR 10 SECONDS OR LONGER. DAMAGE MAY OCCUR TO THE UNIT WHICH COULD INVALIDATE THE WARRANTY.

Turn faucet on and allow the water run for 10 seconds, then attach the shower head.

Note: Only use the shower head included with this Marey® Heater.
Damage may occur if a replacement head is installed and this could also void your warranty.

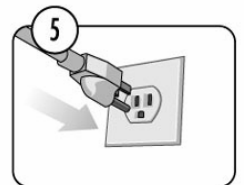

Step 5

Plug the heater to a grounded receptacle* six feet away from the shower area.
An independent 30 amp breaker is required. Power supply must be 6' from heater.

Congratulations installation is now complete!

When you turn on the faucet you'll have an endless supply of *HOT WATER!*

YOU MAY SET THE TEMPERATURE BY REGULATING THE FLOW OF WATER
Slowing the flow creates hotter water.

Warranty: Limited six (6) month warranty. Shower heaters that become damaged due to improper installation including failing to run water through the unit for 10 second or longer – before plugging the unit in to the power source or NOT using the original shower head will not be covered under the manufacturers warranty. Receipt of purchase must accompany all returns.

This shower heater is intended for indoor use only.

Please feel free to contact us if you have any questions about proper installation or other concerns: servicio@marey.com
